To: Residents of Four Seasons
From: Joe Gallaher, Project Manager, E. Meier Contracting

We have begun Marking and Saw Cutting Specific Street Slabs in 4 Areas of your Community.

Removal of these Street Slabs is scheduled to begin tentatively weather permitting Monday March 6 and continue for approximately the next 20 – 30 days as weather permits.

Please look at the Aerial of the Street where you live to see how this will affect you.
The Red Area is scheduled to tentatively start Monday March 6 weather permitting.

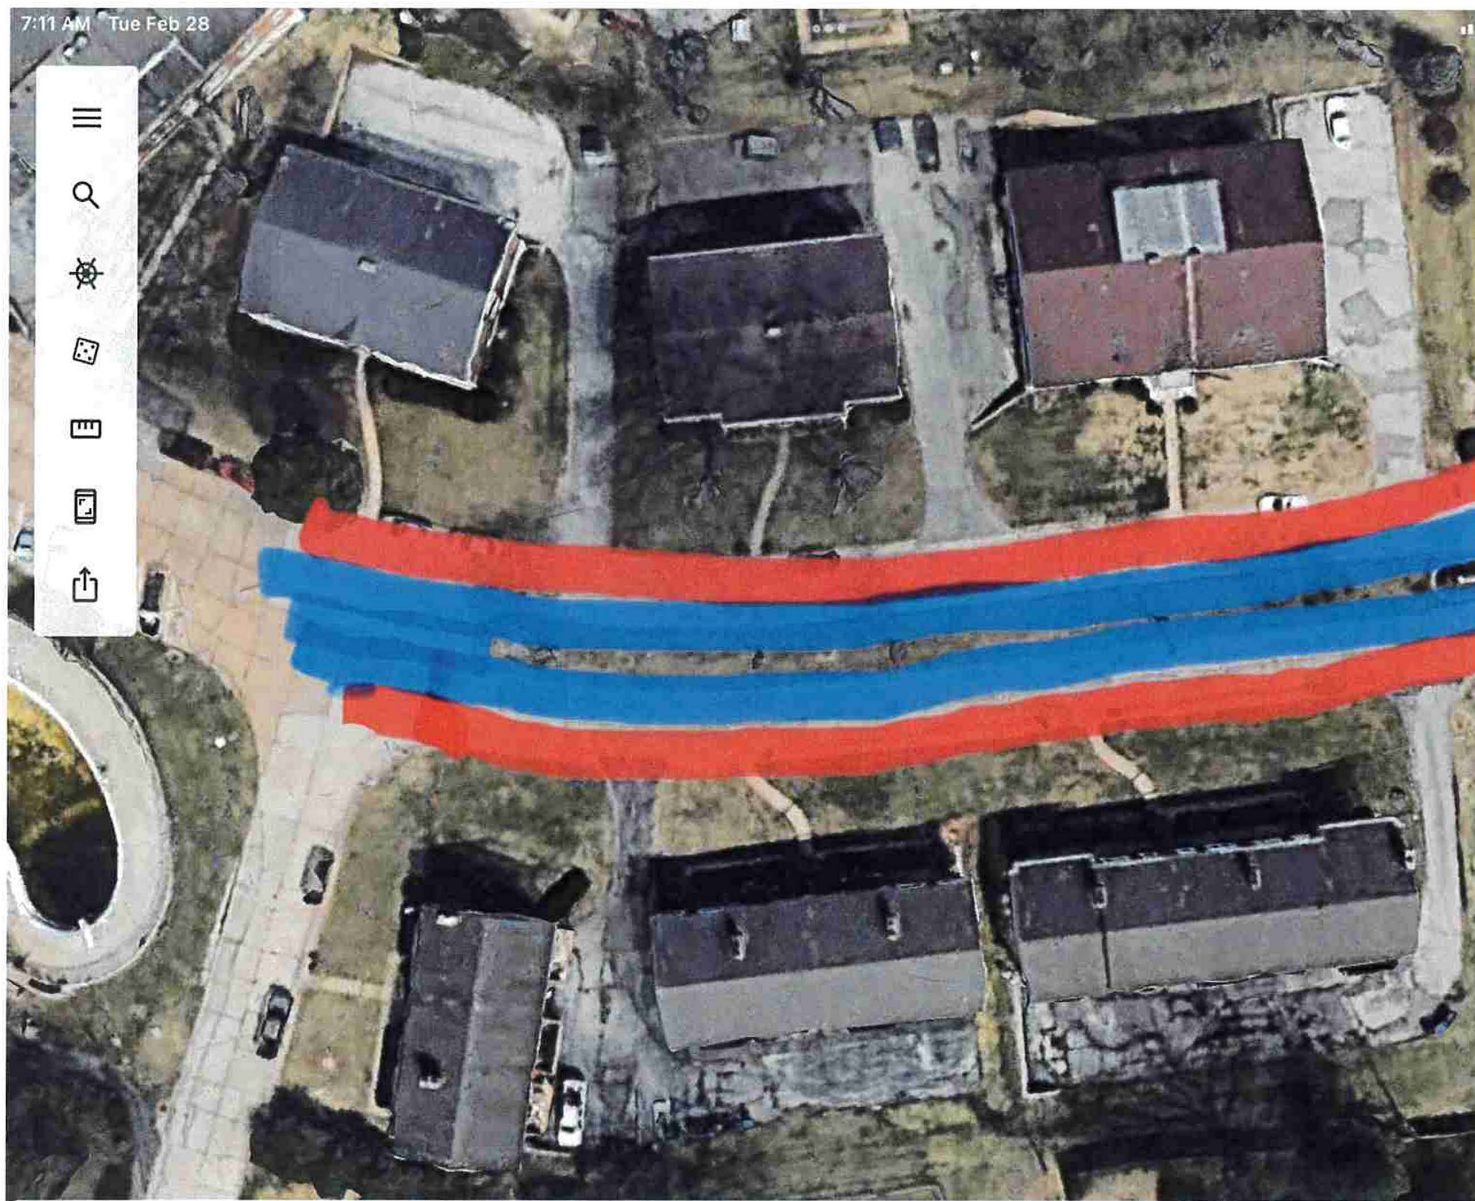

The Blue Area is scheduled to tentatively start some time the week of March 13 weather permitting.

You will need to park your vehicles out away from the work area prior to the start of excavation to access your vehicles. Each Phase will take approximately 10 days to complete barring weather delays.

If you park in the work area your vehicle may get towed. If your vehicle is towed then you will need to contact your Board Members to locate your vehicle and reclaim it.

All of the above work is being done to beautify your Community. We appreciate your cooperation!
